

MOBILE COMPUTING LAB BSCSF15M Dec 17, 2018

Lab-06

Total Marks: 20

Average expected time for completion: 1 hour

Extension of previous lab:

Consider following assumptions and requirements and complete application.

Create Teacher and Student tables with following attributes

Teacher: Name, Email

Student: Name, Email

Task: 1 (05)

Insert five records against each table (You may hard code or use insertion code of your previous lab)

Task: 2 (05)

Create a home screen having 2 button (Teacher, Student)

Task: 3 (10)

In Activity, get all teachers and student's data separately in two collection objects.

Add two fragments in Activity

Display teacher data in Fragment 01 and student data in Fragment 02 on relevant button click.

Note: To display data in fragments, you may use scroll view, recycler view or text view depending upon your ease.
